If you operate a Medical or Business Office please call
BIOMED at **(306) 253-4476** to arrange for needle
containers and disposal services.

Needle Safety & Disposal

What's the Point?

Prevent harm to others by

1 Asking your pharmacist if they provide a needle disposal program

or

2 Putting your used needles in a hard container (biohazard container, liquid laundry detergent container or bleach container) and placing in a Needle Drop Box

Don't leave your needles poking around

- Do not put your needles in the **garbage** or **recycling** bins
- Do not put your needles down the toilet, drain, or sewer
- Do not litter needles in parks or other public spaces

Needles that are not disposed of safely may result in harm to others, such as workers, children, or animals

Needle Drop Box Locations

- Community Locations
- Fire Stations
